

Sustainable Energy
Infinite Possibilities

WHO // WE ARE

With over 25 years in the energy sector and over a decade of solar PV expertise, Eternal Renewables is among India's fastest-growing EPCM companies. We specialize in end-to-end clean energy and energy storage solutions, helping industries and communities shift from fossil fuels to sustainable, carbon-free alternatives for a greener future.

WHY// CHOOSE US?

100% success rate in regulatory approvals

Turnkey EPCM solutions and long-term asset management

On-grid & off-grid energy solutions

Tier-1 technology & ISO-certified processes

Over 200 MWp of successfully developed projects

Community-first approach and local engagement

Committed to net-zero, safety and biodiversity

Long-Term Asset Management

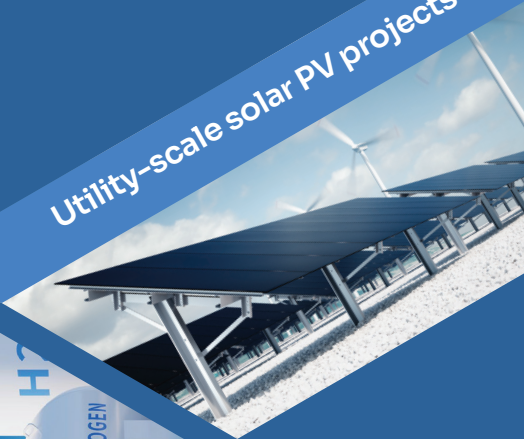

Partner with Eternal Renewables for reliable, scalable and sustainable green energy solutions.

OUR CORE OFFERINGS

Green Hydrogen Solutions

Utility-scale solar PV projects

Energy Storage Systems (BESS)

Wind-solar hybrid solutions

Microgrids & off-grid Installations

Rooftop & ground-mounted solar installations

OUR PROCESS

Precision-led execution, from concept to commissioning and beyond.

Site Survey & feasibility

Detailed surveys and community-aligned site selection.

Design & execution

Optimized layouts, scalable and regulation-compliant

Construction & grid integration

Turnkey builds with ISO-certified practices.

Commissioning & operation

Seamless operations and grid connection.

Long-Term asset management

Real-time monitoring, maintenance and yield optimization.

OUR STRENGTHS

EPC execution

ISO 9001 standards, global engineering best practices, turnkey and custom energy solutions with tier-1 technology

End-to-end compliance

Expertise in land, grid and government approvals.

Smart & sustainable

BESS, hybrid power and Green Hydrogen integration.

Safety first

ISO 45001 and ISO 14001 certified while ensuring everyone is safe, always.

BUILT FOR IMPACT //

Biodiversity-first
solar farms

24% increase in on-site
flora & fauna

Reduced carbon
footprint for industries
& utilities

Tailored Power
Purchase Agreements
(PPAs)

Community jobs, CSR initiatives
& local partnerships

// WHO WE SERVE //

Industrial parks
& corporates

Public utilities &
government projects

Remote communities
& rural clusters

OUR PROJECT PORTFOLIO

Innovative, scalable and sustainable energy solutions designed to reduce carbon emissions and support your clean energy goals.

Large-scale ground-mounted solar farms

High-output installations for utility-scale power supply

Rooftop solar for C&I

Efficient systems for factories, institutions and homes

Wind-Solar hybrid plants

Designed for uninterrupted performance in variable conditions

Mini-Grids with Storage

Integrated solar, wind, and battery systems for remote areas

Round-the-clock power systems

BESS-enabled hybrid systems for 24/7 stable power

Hydrogen energy infrastructure

Next-gen power for industries

SUSTAINABILITY

- Ensure net-zero future and environmental stewardship
- ISO 14001 & ISO 45001 certifications
- “Everyone Safe Always” work culture
- Continuous training, audits and operational protocols
- Biodiversity-integrated energy site designs
